A la fortune du pot - Working as kictchen clerk the first year and as waiter the second one.

Awards & Projects

• Congratulated by our school for being chosen to take part of the zero-gravity flight organized by the CNES thanks to the special drone we built (check my website)

• Currently building an Android app with 4 other students enabling people to trade services. (I build the Java Logic and the PHP/mySQL server).

• Preparing conferences about AI for other students to explain basics of Machine Learning and Deep Learning to everyone.

• Participated to multiple code competitions like HashCode, Kaggle and I learnt most of what I know about AI with Google Developpers website
